Executive Assessment

Your resume achieves an ATS Compatibility Score of 61.4/100 and a Job Match of 63.9% for the Backend Developer role at Vercel. We identified 2 matching keywords and 1 skill gap areas. Applying the recommended bullet points and adding the high-priority missing terms will significantly boost interview callbacks.

Keyword & Technical Coverage

Critical Missing:	None! Excellent core keyword alignment.
Recommended Additions:	Kubernetes
Successfully Matched:	Python, Fastapi

ATS Formatting & Structural Compliance

Audit Category	Status	Finding & Action
Multi-column layout	PASSED	Single-column structure confirmed: Standard linear layout ensures ATS scanners parse your experience chronologically without disruption.
Tables	PASSED	No table structures detected: Text flows cleanly without nested table structures.
Graphics	PASSED	Clean vector typography without raster graphics: No unreadable graphical elements found.
Contact information	CRITICAL	Missing critical contact details (email address, phone number): Add your email and phone number prominently in the contact header.
Section headings	WARNING	Non-standard section headings for: education, skills: Use standard titles for: Education, Skills.
Resume length	WARNING	Resume is brief (18 words): Target 450 to 900 words to comprehensively cover responsibilities and achievements.

Priority Action Items

- [Skills] Enhance Cloud & Infrastructure keywords: Add AWS or Docker skills directly into your technical summary.
- [Experience] Quantify bullet points with outcome metrics: Rewrite bullets following the formula: [Action Verb] + [Task/Scope] + [Result with Metric % or \$].

3. **[Formatting] Ensure 100% single-column ATS compatibility:** Verify contact information is placed in the primary body flow rather than embedded in graphical headers.
4. **[Summary] Align resume header with target role: Backend Developer:** Tailor your headline to explicitly mention 'Backend Developer' to boost recruiter search relevancy.
